NAME

relinkworkscratch − a simple script to reestablish the work and scratch directory symlinks in a user's home directory.

SYNOPSIS

relinkworkscratch [OPTIONS]

DESCRIPTION

relinkworkscratch is a simple but powerful tool for relinking the work and scratch directory. Users sometimes accidentally delete the symlink to their work and scratch directories, and they do not know how to fix it. Therefore, relinkworkscratch provides a high−level abstraction for relinking the directories. All the user has to do is run a single command.

OPTIONS

-V|--version

Print relinkworkscratch version info.

--license

Print relinkworkscratch licensing info.

--help   Print help info.

FILES

/gpfs/group/dml129/default/sw7/iaskutils/bin/relinkworkscratch

/gpfs/group/dml129/default/sw7/iaskutils/relinkworkscratch.py

/gpfs/group/dml129/default/sw7/iaskutils/utils/print_license.py

/gpfs/group/dml129/default/sw7/iaskutils/utils/special_print.py

/gpfs/group/dml129/default/sw7/iaskutils/utils/verifylocale.py

EXAMPLES

relinkworkscratch

Relink your work and scratch directories in your home directory on Roar.

BUGS

No known bugs. If you encounter a bug using this script, please open an issue at https://github.com/ICDS-Roar/iaskutils.
